Clinical notes

Beyfortus (nirsevimab): RSV monoclonal antibody. Recommended from 2 months during RSV season (April–August in SA). Single IM dose. Not a vaccine — no batch immunity; protects current season only.

Influenza: Annual vaccine from 6 months. Two doses 4 weeks apart if receiving for the first time. Subsequent years: single dose. Reformulated annually — prior season batch is not valid.

Menactra (MenACWY): Sanofi conjugate vaccine. SA private schedule. Single dose from 9 months; booster at 4–6 years if first dose given before 2 years.

Clinical verification

This record was exported by Dr R Stander (MP0123456), Atlantic Children's Practice, on 24 April 2026.

Verified entries reflect clinical administration confirmed within the Raising Atlantic platform.

Parent-reported entries are flagged and have not been independently verified.
